

Name: _____

The
Scientific
Method

Step 1
Ask A Question

When experimenting and researching, scientists often start by asking a question "I wonder what would happen if..." Today, I will give you a few items. Think of a wondering you might have that could include these items. It might help to start with "I wonder what would happen if I..."

After asking a question, scientists set up a safe environment and then try to see what would happen. After, they record what they learned.
